

OBESITY: MORE THAN JUST A FEW EXTRA POUNDS

Sure, extra weight is annoying, even embarrassing.
But it's what that extra weight is doing to your body that is the real long-term problem.

Let's face it - obesity is not something that most of us can overcome on our own. Eating less or exercising more aren't enough. Obesity is a complex disease of multiple interlocking aspects which inevitably causes more health issues.

That's why you need an obesity medicine clinician – they treat obesity using a comprehensive approach.

DR. ROBERT ABBATE OFFERS AN APPROACH TO OBESITY THAT WORKS

CALL 972 292-7258

WHAT THE PATIENTS SAY

I have been going to Dr. Abbate for a few months. I started at 213 lbs. I am now at 173 lbs and in my best health in over 20 years...We worked together to achieve my goals. I say "we" because Dr. Abbate truly cares and always took the time during my appointments to work through any issues/concerns I had...Thank You Dr. Abbate!

S. Stanberry

In my first month I lost 17lbs. I lost another 10 in my second month. I have gone from a size 14 to a 9, and I'm still losing...Finding Dr. Abbate has changed my life for the better.

J. Reece

PHYSICIAN'S
WEIGHT LOSS
SOLUTION

OBESITY IS A DISEASE

TREAT IT WITH A DOCTOR

What's the real key to succeeding at weight loss?

A program supervised by a physician who specializes in Obesity Medicine.

Someone who treats obesity as the disease that it is - not a character flaw.

A doctor who can bring a range of different tools to the table: behavior, exercise, diet, medications. A caring medical expert who develop an individualized plan for you to fight weight gain and improve your overall health...

DR ROBERT ABBATE
AND HIS STAFF AT THE
ABBATE AESTHETICS
& WELLNESS CENTER

We start by learning all about *you* - your lifestyle, medical history, social history, background, dietary, metabolic and exercise patterns.

Then Dr. Abbate will coach you through an individualized, comprehensive treatment that ensures you lose weight without difficulty - and keep going. Dr Abbate and his staff help you not just to lose weight, but to understand your disease and approach it in a new manner.

Right from the start we offer you motivation and a promise:
you can look better, feel better, and maybe even live longer.
